

Calculation of the levelling field book

There was measured levelling line between two permanent benchmarks *nr. 286* and *nr. 586*. Make the assessment of the accuracy of the measurement. Make the adjustment of the levelling line and then calculate absolute heights of intermediate points *B1*, *B2* a *B3*.

- ⊗ Levelling rod placed on the benchmark
- Standpoint of the levelling instrument
- Levelling rod placed on the footplate on the change point
- Levelling rod placed on the intermediate point
- Backsight
- Foresight
